## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see Remarks (page 13), filed 8/28/2006, with respect to claims 31-34 have been fully considered and are persuasive. The rejection of claims 31-34 has been withdrawn.

### ***Allowable Subject Matter***

2. Claims 22-50 are allowed.

3. The following is an examiner's statement of reasons for allowance:

\* Claim 31 has been amended to overcome the rejection under 35 USC 112, second paragraph;

\* Claims 33 and 34 have been amended to overcome the rejection under 35 USC 101;

\* The present invention provides a new method, system, and computer readable medium for transferring data from a server to at least one client, wherein large amounts of data have been transferred over networks (specification, page 1, second paragraph).

Particularly, the new method, system and computer readable medium comprise the following features, which the prior art taken either singly or in combination does not teach:

- transforming source data into hierarchical representation comprising a plurality of coefficients, said hierarchical representation comprising a plurality of levels of essentially non-redundant data, wherein a level of said hierarchical representation

Art Unit: 2624

comprises transform data sufficient to reconstruct said source data at a resolution corresponding to said level (see independent claims 22, );

- transforming source data into hierarchical representation using a wavelet transform with fixed point kernels, said hierarchical representation comprising a plurality of levels of essentially non-redundant data, wherein a level of said hierarchical representation comprises transform data sufficient to reconstruct said source data at a resolution corresponding to said level (see independent claims 23 and 35);

- said transform data generated from one source data using a wavelet transform with fixed point kernels, said hierarchical representation comprising a plurality of levels of essentially non-redundant data, wherein a level of said hierarchical representation comprises transform data sufficient to reconstruct said source data at a resolution corresponding to said level (see independent claims 29, 31 and 33);

- transforming source data into hierarchical representation using a wavelet transform, said hierarchical representation comprising a plurality of levels of essentially non-redundant data, wherein a level of said hierarchical representation comprises transform data sufficient to reconstruct said source data at a resolution corresponding to said level (see independent claims 41 and 42);

- transforming multi-component source data into a vector of multi-spectral transform data comprising a hierarchical representation with a plurality of levels of essentially non-redundant data, wherein a level of said hierarchical representation comprises multi-spectral transform data sufficient to reconstruct said multi-component

Art Unit: 2624

source data at a resolution corresponding to said level (see independent claims 43 and 47).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
